## Early European Agriculture Its Foundation

In Europe agriculture developed through a combination of migration and diffusion. The oldest sites with agriculture are along the Mediterranean coast, where long-distance population movement and trade could be easily effected by boat. Franchthi Cave in southeastern Greece, a site occupied for more than 15,000 years, documents the development of agriculture in southern Europe over several centuries.

By the time of the predynastic Amratian culture, about 5550 bp, agriculture appears to have begun in the valley alluviums of the Nile. By late predynastic times, about 5050 bp, there is evidence of a considerable growth in wealth deriving from agricultural development and accompanied by a more hierarchical social system.

## **Origins of agriculture - The Nile valley | Britannica**

The first agriculture appears to have developed at the closing of the last Pleistocene glacial period, or Ice Age (about 11,700 years ago). At that time temperatures warmed, glaciers melted, sea levels rose, and ecosystems throughout the world reorganized. The changes were more dramatic in temperate regions than in the tropics.
