### **Xr6 Engine**

This engine is found in the BF Falcon XR6 Turbo and the SY Territory Turbo, and was produced between mid 2005 and early 2008. It is internally very similar to its predecessor, with the 5 kW power increase found through the changes introduced by the Barra 190 (revised camshaft profiles and more powerful ECU, enabling dual independent VCT with an extra knock sensor).

The engine is very strong (as strong as the Turbo one) but has slightly higher compression ratio, for which we compensate when tuning. This boost pressure should net you around 220 Kw to the wheels which is more than the usual 210 Kw we get on standard BA/BF XR6 turbos. The stock BA/BF N/A XR6 is around 130 - 140 Kw to the wheels on our dyno.

### **Barra 270T Engine (FG/FGX XR6 Turbo: 2008-16)**

The XR6 Turbo is powered by the I6 Turbo engine, producing 270 kW / 533 Nm. Early estimates indicate the car will go from 0-100 in just a tad over 5 seconds. But this is yet to be confirmed.

### **2008 Ford FG Falcon XR6 Turbo specifications | CarAdvice**

The BA/BF XR6 Turbos scored Garrett's GT3540 turbo, a massive snail capable of flowing triple the 5psi boost Ford put through them. This was one of the easy ways to double the power of your XR6T, as the stock turbo would make more boost than the bottom-end could take, though you did need to upgrade the wastegate spring.
